

Eduardo Barrios

Visual Artist

Artist Statement

Chilean Surrealist Artist and Sculptor currently based in the United Kingdom. Investigating the cycle of life and evolution, focusing on the human form and the spiritual or subconscious being in a surrealist style. The true likeness of the form is not essential, but the idea it represents. He gains Inspiration from the ocean, often incorporating waves, various types of bodies of water, incorporating symbolism to bring forward an idea. Such as boats as a rite of passage and hope, butterflies as transmutation or new beginning. The most recent projects deal with Apocalyptic Dreams in 2D oil paintings and AI enhanced digital series based on the oil painting with some specific alterations not to depart from the topic.
